

**In the Claims:**

Please rewrite claims to read as follows:

C1  
1. (once amended) A method for preventing or correcting a vitamin deficiency in a dialysis patient comprising dialysis of the patient with a dialysate solution which comprises an effective amount of at least one vitamin selected from the group consisting of folic acid, vitamin B<sub>6</sub>, thiamine, vitamin B<sub>12</sub>, and pharmaceutically acceptable salts thereof, wherein the at least one vitamin is present in the dialysate solution in an amount less than a physiological amount or in a supraphysiologic amount.

C2  
11. (once amended) The method of claim 1 wherein the vitamin deficiency is prevented by adding less than a physiological amount of the at least one vitamin to the dialysate solution.

12  
12. (once amended) The method of claim 1 wherein the vitamin deficiency is prevented or corrected by adding a supraphysiologic amount of the at least one vitamin to the dialysate solution.

C3  
36. (once amended) A dialysate solution comprising an effective amount of at least one vitamin selected from the group consisting of folic acid, vitamin B<sub>6</sub>, thiamine, vitamin B<sub>12</sub>, and pharmaceutically acceptable salts thereof, wherein the at least one vitamin is present in the dialysate solution in less than a physiological amount or in a supraphysiologic amount.

✓  
Please add the following new claims:

C4  
39  
39. (new) The method of claim 1 wherein the amount less than the physiological amount is equal to the total normal plasma level concentration of the at least one vitamin  $\div (V_p/V_D)^2$ .
